

HELP  
SAVING  
AFRICA

Although Roman Baláž is not a professional photographer, the work that he creates shows his great feeling for photography, his ability to capture the right moment to pull the shutter release and how to choose a composition in tune with its environment and its colours.

His favourite hobby – taking photographs of nature and wild animals, many of which species are among the most endangered, is enhanced by a charitable mission: An effort to help prevent the slaughter of rare species of animals in Africa for profit. This motivates him to go on more and more new expeditions “without weapons”, just with a camera. Therefore he wants to continue to expand his unending photographic cycle. Through auctions of his photographs Roman Baláž raises funds for active and effective support in the fight against this sad phenomenon of modern-day Africa.

I believe in the power of a perfectly targeted shot.

Without **EDUCATION** rural people cannot break the cycle of poverty. In remote communities, schools are often overlooked and chronically lacking in resources. Since its founding, Africa Foundation has made the building and improvement of preschools, primary schools and high schools a priority. In addition, it develops and funds scholarship programmes, conducts vocational training, facilitates adult education and supports orphaned and vulnerable children.

**HEALTH CARE & CLEAN WATER** are essential to the successful development of rural communities. A community without adequate healthcare cannot thrive. Community members without a reliable source of clean water spends hours every day walking many miles to collect water for their families, keeping children out of school and their parents away from income earning opportunities. Sadly, this water often contains diseases too. Africa Foundation builds and upgrades clinics and accommodation for medical staff, facilitates HIV/AIDS awareness programmes and other healthcare counselling and helps provide access to clean water. Adequate healthcare and clean water means improved education and income earning ability.

**SMALL BUSINESS DEVELOPMENT** strengthens rural communities, whose members must have a source of income to provide for their families. Africa Foundation works with communities on agricultural projects, provides entrepreneurial support and builds skills centres and markets in which community members can sell their products. This helps to not only develop people’s personal growth, but also grows local economies and capabilities. Many of the staff members in surrounding safari lodges come from local communities and are trained to work in various aspects of safari lodge operations. A large focus for these lodges is on local procurement, where Africa Foundation facilitates the linking of small community businesses to other local businesses and adjacent lodges.

The **ENVIRONMENT AND CONSERVATION** programme aims to provide rural communities with the capacity for informed decision making about land management and conservation, and also focuses on the conservation of wildlife. Students learn about the neighbouring game reserves through conservation lessons and visits to the reserves. The programmes also includes community training on subjects such as the effective use of water resources. In this way, both the communities and conservation benefit. When communities surrounding conservation areas experience the benefits of responsible tourism, they support the conservation and biodiversity of reserves for the benefit of future generations. The recently created Rhinos Without Borders rhino translocation project will provide essential protection to this endangered member of Africa’s “Big Five.”

## MASAI MARA KENYA

The Maasai Mara National Reserve (also known as Maasai Mara and by the locals as The Mara) is a large game reserve in Narok County, Kenya; contiguous with the Serengeti National Park in Mara Region, Tanzania. It is named in honor of the Maasai people (the ancestral inhabitants of the area) and their description of the area when looked at from afar: „Mara,“ which is Maa (Maasai language) for „spotted,“ an apt description for the circles of trees, scrub, savanna, and cloud shadows that mark the area.

It is globally famous for its exceptional population of Masai lions, African leopards and Tanzanian cheetahs, and the annual migration of zebra, Thomson’s gazelle, and wildebeest to and from the Serengeti every year from July to October, known as the Great Migration.

The Maasai Mara National Reserve is only a fraction of the Greater Mara Ecosystem, which includes the following Group Ranches: Koiyaki, Lemek, Ol Chorro Oiorwua, Olkinyei, Siana, Maji Moto, Naikara, Ol Derkesi, Kerinkani, Oloirien, and Kimintet.

## SERENGETI TANZANIA

The Serengeti ecosystem is a geographical region in Africa. It is located in northern Tanzania and extends to south-western Kenya between 1 and 3 degrees south latitudes and between 34 and 36 degrees east longitudes. It spans approximately 30,000 km<sup>2</sup> (12,000 sq mi).

The Kenyan part of the Serengeti is known as Maasai Mara.

The Serengeti hosts the largest terrestrial mammal migration in the world, which helps secure it as one of the Seven Natural Wonders of Africa and one of the ten natural travel wonders of the world. The Serengeti is also renowned for its large lion population and is one of the best places to observe prides in their natural environment. The region contains the Serengeti National Park in Tanzania and several game reserves.

Approximately 70 large mammal and 500 bird species are found there. This high diversity is a function of diverse habitats, including riverine forests, swamps, kopjes, grasslands, and woodlands. Blue wildebeests, gazelles, zebras, and buffalos are some of the commonly found large mammals in the region. There has been controversy about a proposed road to be built through the Serengeti. Serengeti is derived from the Maasai language, Maa; specifically, „Serengit“ meaning „Endless Plains“.

## NGORONGORO CRATER

TANZANIA

The Ngorongoro Conservation Area (NCA) is a protected area and a World Heritage Site located 180 km (110 mi) west of Arusha in the Crater Highlands area of Tanzania. The area is named after Ngorongoro Crater, a large volcanic caldera within the area. The conservation area is administered by the Ngorongoro Conservation Area Authority, an arm of the Tanzanian government, and its boundaries follow the boundary of the Ngorongoro Division of the Arusha Region. It has been reported in 2009 that the government authority has proposed a reduction of the population of the conservation area from 65,000 to 25,000. There are plans being considered for 14 more luxury tourist hotels, so people can access „the unparalleled beauty of one of the world’s most unchanged wildlife sanctuaries“.

## THE OKAVANGO DELTA

BOTSWANA

The Okavango Delta (or Okavango Grassland) (formerly spelled Okovango or Okovanggo) in Botswana is a very large, swampy inland delta formed where the Okavango River reaches a tectonic trough in the central part of the endorheic basin of the Kalahari. All the water reaching the Delta is ultimately evaporated and transpired, and does not flow into any sea or ocean. Each year approximately 11 cubic kilometers of water spreads over the 6,000-15,000 km<sup>2</sup> area. Some flood-waters drain into Lake Ngami. The Moremi Game Reserve, a National Park, is on the eastern side of the Delta. The scale and magnificence of the Okavango Delta helped it secure a position as one of the Seven Natural Wonders of Africa, which were officially declared on February 11, 2013 in Arusha, Tanzania. On 22 June 2014, the Okavango Delta became the 1000th site to be officially inscribed on the UNESCO World Heritage List. The area was once part of Lake Makgadikgadi, an ancient lake that mostly dried up by the early Holocene. Although the Okavango Delta is widely believed to be the world’s largest inland delta, it is not. In Africa alone there are two larger similar geological features: the Sudd on the Nile in South Sudan, and the Inner Niger Delta in Mali.

## CHOBE NATIONAL PARK

BOTSWANA

Chobe National Park, in northern Botswana, has one of the largest concentrations of game in Africa. By size, it is the third largest park in the country, after the Central Kalahari Game Reserve and the Gemsbok National Park, and is the most biologically diverse. It is also Botswana’s first national park.

## ETOSHA NATIONAL PARK

NAMIBIA

Etosha National Park is a national park in northwestern Namibia. The park was proclaimed a game reserve on March 22, 1907 in Ordinance 88 by the Governor of German South West Africa, Dr. Friedrich von Lindequist. It was designated as Wildschutzgebiet Nr. 2 which means Game Reserve Number 2, in numerical order after West Caprivi (Game Reserve No. 1) and preceding Namib Game Reserve (No. 3). In 1958, Game Reserve No. 2 became Etosha Game Park and was elevated to status of National Park in 1967 by an act of parliament of the Republic of South Africa which administered South-West Africa during that time. Etosha National Park spans an area of 22,270 square kilometres (8,600 sq mi) and gets its name from the large Etosha pan which is almost entirely within the park. The Etosha pan (4,760 square kilometres (1,840 sq mi)) covers 23% of the area of the total area of the Etosha National Park. The park is home to hundreds of species of mammals, birds and reptiles, including several threatened and endangered species such as the black rhinoceros. The park is located in the Kunene region and shares boundaries with the regions of Oshana, Oshikoto and Otjozondjupa.

## KALAHARI

BOTSWANA

Central Kalahari Game Reserve is an extensive national park in the Kalahari desert of Botswana. Established in 1961 it covers an area of 52,800 square kilometres (20,400 sq mi) (about twice the size of Massachusetts, and 1/11 of Botswana’s total land area) making it the second largest game reserve in the world.

## SOSSUVLEI

NAMIBIA

Sossusvlei (sometimes written Sossus Vlei) is a salt and clay pan surrounded by high red dunes, located in the southern part of the Namib Desert, in the Namib-Naukluft National Park of Namibia. The name „Sossusvlei“ is often used in an extended meaning to refer to the surrounding area (including other neighbouring vleis such as Deadvlei and other high dunes), which is one of the major visitor attractions of Namibia. The name „Sossusvlei“ is of mixed origin and roughly means „dead-end marsh“. Vlei is the Afrikaans word for „marsh“, while „sossus“ is Nama for „no return“ or „dead end“. Sossusvlei owes this name to the fact that it is an endorheic drainage basin (i.e., a drainage basin without outflows) for the ephemeral Tsauchab River.
